FILE HEADING

Revised Estimate for the construction of the Mund office building, Mysore

From The Chairman, City Improvt Trust Bd. Mysore

No 106-S 13 / C 113 of 17-18 Dated 9th August 1918 Received 12th August 1918

Diary No 2051	Enclos 8 Spare Copies	Serial No 1

BRIEF ABSTRACT OF LETTER

Submits a note explaining that the amended estimate for Rs 143,800 requires revision for reasons stated bringing the estimate amount roughly to 2 Lakhs and states that if the abstract estimates are sanctioned the detailed revised estimates will be submitted thro' the Chief Engr for formal sanction.

NOTES AND ORDERS

Para 1

The Chief Engineer's design for the construction of a Mund office building at Mysore on the site selected between Mr Ramannah's school and the Sanskrit College was approved with the direction that the cost should be reduced to Rs 1,30,000 by providing for some cheaper work inside

NOTES—First Sheet

WD 1292—GPB—20 000—16-11 1c

Serial No.

the buildings [G O no $\frac{3763-5}{\text{Mdl } 163-14-22}$ S 23 11 15]. The outlay on the work was ordered to be met, $\frac{1}{3}$rd from the Mund Funds and $\frac{2}{3}$rds from the Trust Board Funds [para 2 of G O no $\frac{221-5}{\text{Mdl } 21-14-63}$ S 12 7 1915] The Mund council's share was fixed at $\frac{1}{3}$ of Rs 130,000 = Rs 43,333 $\frac{1}{3}$ & allowed to pay this amount in annual instalments of Rs 5,000 for 8 or 9 years [G O no $\frac{1435-7}{\text{Mdl } 24-15-114}$ S 22 8 16.].

2 A detailed estimate for the work prepared by the chairman and scrutinised by the Chief Engr & passed for Rs 1,43,800 was sanctioned in G O no $\frac{4263-6}{\text{Mdl } 24-16-41}$ S 8 11 17.

3 The land required for the work has been acquired & cleared to start building operations as intimated by the chairman in his periodical progress reports. Mr Siddayya's tender for the work was approved in G O no $\frac{191-3}{\text{Mdl } 102-17-2}$ S 12 10 1917

4 Subsequently owing to rise in prices of iron an enhanced rate of Rs 41 8 0 per cwt against the estimated rate of Rs 29 8 0 per cwt was sanctioned in G O no $\frac{5017-8}{\text{Mdl } 52-17-5}$ S 14 3 1918, with the result that Rs 12000 had to be added to the estimated amount of Rs 1,43,800 or Rs 1,55,800.

5 In the note enclosed to the paper under disposal, the chairman explains

NOTE—Contd on

Serial No.

the necessity for further modifications and suggests the following additions:—

(i) For increase in the depth of Foundations &c. — — — — — — 5,700

(ii) Increase in the width of Verandas from 6' to 10' — — — 20,000

(iii) For a laboratory & sanitary appliances — — 18,500

44,200

6 This with the estimate already sanctioned amounts to roughly two lakhs of rupees. If his proposals are approved by Govt the Chairman states he will submit the detailed revised estimates thro' the Chief Engr. for formal sanction.

7 In this connection the following points require orders.

i) Whether the Municipality should not resolve to bear the proportionate increase of the estimate from their funds.

There is said to be a likelihood of Municipality about this — by —

ii) Whether they should pay such increased quota by increased instalment in the same period or by the same amount of instalment in a longer period

This may be ordered in due course — by —

[The necessity for a separate Mussal Office

	7th Sep 1918 requested to submit the resolution of the Muni council agreeing to pay their share in 3 instalments of proportionately larger amounts. In reply the Chairman forwards
813	copy of resolution of the Muni council dated 30-8-19 approving of the revised plans and estimates and agreeing to pay the quota in a proportionately larger number of instalments. This resolution is silent as to whether the estimate for Rs 2 lakhs or that for Rs 3,78,200 now received from the Chief Engineer was passed by the Muni council.
	19) The points for consideration are whether

P T O

Note—Contn. sheet.

B. B. III-2]

General and Revenue Secretariat

14 File No 62 of 191 8

Serial No

Further inquiry is necessary on this point by

(a) it would not be necessary to make sure whether they have approved of the estimate for Rs 2,98,200 and

(b) Govt are prepared to accept the proposal of the MC to pay their quota in a proportionately larger number of instalments at Rs 5000 a year.

At this rate the MC will take $\frac{2,98,200}{3} \times \frac{1}{5000}$ or nearly 20 years to fully contribute their quota

There is too long a period The amt. of each instalment has to be increased so that the full contribution may be realised in 10 or 17 years

30) In view of the present financial stringency it is very doubtful when funds can be provided for the purpose if the work is not taken up within a year of the framing of the estimate & completed within three years from start of work the probabilities are that the Estimate will have to be revised & fresh sanction the ways & means are sought if it seems to me to be futile to consider this matter. The weight of the evidence is that the cost of the work will be 3/4 of the cost & pay its share in 10 annual instalments also in any case

This may be made subject to a reasonable time bar

I cannot now say that grant can be allowed to the Trust Board next year. One point, however, is quite clear. There will be absolutely no room in the budget of next year for any item of optional expenditure. To a very large extent, the charges incurred by the Trust Board come under this category and they must wait until money can be found. On no ground will it be justifiable to allow grants to the Trust Board for acquisition of buildings and construction of buildings by creating deficits I would, therefore, suggest that it may be assumed that there is no possibility of allowing a larger grant to the Trust Board in the next year than half a lakh.

Sir,

Government Order No 4263-6 ML, 24-16-41 dated the 8th January 1917, according sanction to an estimate amounting to Rs. 1,43,800 for constructing the Municipal Office building at Mysore

---

I have the honour to report that some modifications are found necessary in the Estimate sanctioned for constructing the Municipal Office building at Mysore and the accompanying note explains the necessity for such modifications.

2 The result of these modifications is an increase in the amount of Estimate ~~xxxxxx~~ raising it to Rs 2 lakhs. The principal items which have rendered this necessary are -

(i) The increase in the cost of girders for which orders have been placed.

(ii) Increase in the depth of the verandahs from 6' as sanctioned, to 10'

(iii) Increase in depth of foundations and

(iv) ~~the~~ new provision made for adding a laboratory and sanitary conveniences

For (i), sanction of Government has been obtained in G.O No. 5097-8/ML 52-17-16 of 14-3-18

Subject 12 AUG 1918

11743

Soliciting early orders of Government on the modified estimate for constructing the Municipal office building at Mysore

Item (ii) Owing to the size and importance of the building, an increase in the depth of the Verandah to 10' is considered necessary as a 6' verandah gives very little protection in such a high building from sun and rain, more particularly as the verandah will be used by petitioners and the public, attending the Municipal Office on business

Item (iii) is necessary owing the poor soil met with at the sanctioned depth of excavation

and Item (iv) is also considered necessary

The Board of Trustees in their meeting held on the 29th July considered these questions and were unanimously of the opinion that they are all necessary A copy of their resolution on the subject is encolsed for easy reference.

3. I submit herewith the sanctioned plans and blue prints with the modified proposals for perusal and obliging return when done with. An abstract estimate is also enclosed for information. On receipt of orders on the above, detailed revised estimates will be submitted for formal sanction through the Public Works Department.

4. Except at the south end, the houses required for forming the site for the Municipal Office main building have been taken possession of and excavation for foundations has been carried out except for verandahs. Necessary materials for the work are under collection

I solicit the favour of early orders on the above, to enable the works being proceeded with

5 A copy of the resolution with a blue print of the -- modified plan are being sent to the Municipal Council for information

XXIV. Estimate and plans for the New Municipal Offices

Resolved to request that the plans and estimates be revised so as to provide the extent of accommodation required as per Note on the subject

x x x

Sd/- C Srikantesvara Aiyar,

President

"C O P Y"

President.

NOTE

ON THE NEW MUNICIPAL OFFICE BUILDINGS

NOTE

On the New Municipal Office Buildings.

1. The new Municipal Office Buildings when completed will have to accommodate the permanent offices of the City Municipal Council, the semi-permanent offices of the City Improvement Department, and also the offices of the City Water Supply and Electrical Departments.

The Municipal Council has two adminis-trative officers, viz the President and the Vice-President and three Executive Officers, viz., the Health Officer, the Chief Officer and the Municipal Engineer. Each of the Executive Officers has under him a number of sub-departments, besides the ministerial and the menial staff.

The City Improvement Department will have two or three Officers including an Acquisition Officer. Being a department mainly concerned with acquisition of properties and with large engineering works of City improvements, it has an elaborate subordinate engineering and clerical staff.

The Municipal and the Improvement offices are at present located, the former in the Rangacharlu Memorial Hall and the latter in what is known as Loey's Court buildings. Neither of the buildings are sufficient or suitable for the purpose, cramped accommodation having been somehow improvised.

It is therefore necessary that before the

Pre sident.

the actual constructional work of the new Municipal Offices is begun it must be seen that there will be in the new buildings adequate accommodation for every department and sub-department of both the Municipal and City Improvement offices

XI. The approved plan now received has 5 halls in the ground floor and 5 in the 1st floor. The out-houses contain 9 large rooms and a large hall on either side for motor cars, carriages and steam road roller. It is proposed to divide and sub-divide the halls in the main building into 52 apartments by means of partitions. There is a plan in the file which shows such partitions.

The minimum accommodation required for the Municipal and City Improvement Offices would be as follows -

Large Office rooms- 8

1. President	)	
2. Vice-President	)	
3. Chief Officer	)	
4. Health Officer	)	Municipal
5. Municipal Engineer	)	
6. Chairman, Trust Board	)	
7. Assistant Engineer "	)	Trust Board
8. Acquisition Officer"	)	

Small Offices rooms- 7.

1. Manager	)	
2. Collector	)	
3. Daroga	)	Municipal
4. Education Officer	)	
5. Manager	)	
6. Head Accountant	)	Trust Board
7. Head Clerk	)	

Large Halls- 17

1. Municipal General (ministerial staff)	)	
2. Mohatarfa (ministerial staff)	)	
	)	Municipal

3. Records General
4. Health Office clerical staff
5. Health Office Sanitary Inspectors
6. Health Office Overseers and Sub-Overseers
7. Health Office library and meeting room
8. Health Office Laboratory
9. D.F.W. Sub-Overseers and Avenue Inspector
10. Municipal Stores
11. Council Hall
12. Councillors' room and library.

13. Trust Board D.F.W. ministerial staff
14. Trust Board acquisition ministerial staff
15. Trust Board Overseers and Sub-Overseers D.F.W.
16. Trust Board Records
17. Trust Board stores.

Trust Board

Small halls- 8

1. Health Office Vaccinators
2. Health Office Stores
3. D.F.W. Draughtsman
4. D.F.W. Clark and Stores
5. Clerk, Education Officer.

Municipal

6. Trust Board Draughtsman

Trust Board

7. Visitors.
8. Tiffin rooms.

Total accommodation required-

Large Office rooms	8
Small Office rooms	7
Large halls	17
Small halls	8
Total	40

Of these, Municipal and City Improvement records and stores and the tiffin room may be located in the large rooms in the out-houses where there are 9 of them with slight adjustments, there will thus be in the main building, barely sufficient accommodation for the rest (32 rooms and halls).

The requirements of the City Water Supply and Electrical Departments will have to be

President

be considered separately

So far as accommodation is concerned, it may be just possible to provide as much as is required, by economical partitioning of the halls and the judicious allocation of the apartments to the needs of the several departments of the City Municipality.

III. There are however certain defects in the design, which do not admit of such partitioning without at the same time seriously affecting lighting and ventilation and convenience.

The four large halls beside the central halls in the ground and the first floor have been provided with only doors and no windows. When these halls are partitioned off, some apartments would get to their share, only one door each and no window .

The inconvenience and discomfort in occupying such apartments can only be realized by those who have worked in the Public Offices, Bangalore, District Offices, Mysore and occupied the Lansdowne Bazaars, Mysore. The partitioning of these halls therefore may to some extent be satisfactorily done by partitions, running east and west and on no account by partitions running north and south. And the east and west partitioning should be so done that every apartment will have a large window and a door on either of the eastern and western walls.

Why g is subjected to such restrictions, artments in the main inished and some of

of the establishments would have to be shifted to the out-houses where there will be a couple of more rooms made available.

Perhaps, it would be a decided advantage to add an extra room or two to both floors of the main building, which would also enhance the aesthetic effect of the front aspect of it, for a little more length than disproportionate depth.

IV. The situation of stair cases- In the approved plan there are 3 stair cases leading from the ground floor to the first floor. All the three have been located about the central halls, a very inconvenient thing. It is more convenient and desirable to locate them, one in the central block and one in either wing, akin to what they have in the Motikhana buildings. This would relieve congestion in the central block and help to minimise the noise which necessarily there would be, when all parts of visitors and petitioners crowd into the offices . As it is proposed to utilise the ground floor hall for Council meetings and the first floor hall, partly as President's Office and partly as the Municipal library and Councillors' room, it is absolutely necessary that about these halls there should be minimum of noise, to help discussions and office work to be conducted peacefully

V. Lavatory accommodation- In the file of papers relating to the new Municipal Office buildings, it is proposed to have 6 latrine seats and 6 urinals. These can hardly be considered sufficient for the very large Municipal establishments. Further

President

Further it is proposed to locate them somewhere in the compound. The inconvenience to Officers and Councillors in having to tramp to these out-of-the-way lavatories can be easily imagined; nor should the nuisance and trouble experienced in the Rangacharlu Memorial Hall and similar improvised public offices be lost in vain.

It is, therefore very necessary that lavatories on the flush system should be provided in each of the floors, for the use of Officers and Councillors. There should be at least three in each of the floors in the main building. As in the approved design there is not room to provide these lavatories, necessary alterations in the design would have to be effected.

For the superior office staff, the lavatory accommodation would have to be separate from that of the menial staff . 6 latrine seats proposed may be reserved for the superior staff and 6 more built in for the use of the menials.

The latrines and urinals should not be combined in the same block. This does not suit the Indian habits. The urinals, 6 of them in series in a block should be located separate from the latrines.

VI. Accommodation for motor cars and carriages- At either end of the out-houses, accommodation has been allotted for the steam road roller and cars and carriages. The accommodation is hardly enough. There should be at least room for 4 cars and 4 carriages separate from that

President

that intended for the steam road roller.

VII. Corridors between the halls at either end of the main building and the side halls- There should be arranged for, to enable the public to pass from the front verandah to the rear verandah. As per design in the plan no such corridors have been provided, with the result that visitors, petitioners and the public, if they have to go to the rear verandah from the front verandah they will have to trudge all the way to the central block and then get to their destination, undoubtedly a serious inconvenience.

VIII. These are certain drawbacks and defects that strike one from the study of the plan now sent and it is hoped that they would be rectified before the construction work is taken on hand, so that the City Municipal Office buildings, when completed, may not only serve all the present and prospective Municipal requirements but be a noble edifice, worthy of the Capital of the State

Mysore,

Revenue Department, Bangalore.

Sir

With reference to G.O.No.4263-6/M 24-16-41 dated the 8th January 1917, sanctioning the estimate amounting to Rs1,43,000, for the construction of the Municipal Office building in the Mysore City, I have the honour to forward for favour of sanction, the accompanying revised estimate for the work amounting to Rs2,98,200, received from the Chairman Mysore City Improvement Trust Board.

2. The cause for the excess under the several sub-heads is explained in the comparative statement and the notes and report of the Chairman and President.

3. There is a provision of Rs45,000 for the work in the Trust Board Budget Estimate for the year 1919-20.

I have the honour to be,
Sir,
Your most obedient servant,

For Chief Engineer of Mysore.

To

The Chairman,

Mysore City Improvement Trust Board

Sir,

With reference to your letter No 374-373/C 73 of 19-20 dated 14th April 1920 forwarding the resolution of the City Municipal Council dated 30th August 1919 agreeing to pay its share of the cost of constructing the municipal office building at Rs 5 000 per annum in a proportionately larger number of instalments, I am directed to observe that it is not clear from the resolution of the Municipal Council what the amount of the estimate is that was taken into consideration at the time the resolution was passed, and to enquire whether it is aware of the estimate of Rs 2,98 200 since forwarded by the Chief Engineer to Government for sanction If so, it will take nearly 30 years for the Ml Cl to pay its proportionately larger quota of the cost at the rate of Rs 5,000 per annum

2 I am to state that Government cannot allow ~~the M.C.~~ more than 10 years for the Ml Cl to completely pay their quota of the cost, and to request that the matter may therefore be referred to the Ml Cl for reconsideration and their resolution submitted very early

I have etc,

XII. Letter No.34/4e. dated the 21st July 1920 from the Chairman, City Improvement Trust Board, Mysore, forwarding copy of letter No.R.346/M1.82-18-5 dated the 8th July 1920 from the Secretary to Government, Revenue Department, and requesting the views of the Municipal Council in the matter of paying the Municipal quota of the cost of the New Municipal Offices in ten years.

Resolved that the Municipal Council approve of the revised estimate of Rs.2,98,200/- for the construction of the Municipal Offices

Further resolved that Government be requested to allow the Municipal Council to pay their one-third share of cost, in annual instalments of Rs.5,000/- as hitherto, subject to the revision of the number of instalments, when and as their finances permit of it.

Sd/-C. Srikanteswara Aiyar,
President

Copy of letter No.290 dated the 5th October 1920, from the President, City Municipal Council, Mysore, to the Chairman, City Improvement Trust Board, Mysore.

With reference to your letter No.34 dated the 21st July 1920 anent the payment of the Municipal quota of the cost of constructing the New City Municipal Offices, I have the honour to forward herewith a copy of the Resolution of the Municipal Council dated the 18th September 1920 and to state that much as they would like to pay up as early as possible their share of cost, they regret that it is not possible to do so for the time being considering their meagre resources and the unusually heavy unforeseen expenditure that they have been put to the necessity of incurring to the extent of over Rs.30,000/- towards special allowances and increases according to recent Order of Government which they have to pay to their servants on account of dearness of foodstuffs etc.,

2. They will however, have no objection to modify the arrangements and increase amount of instalments from time to time when and as their finances permit of the same.

Sd/- C Srikanteswara Aiyar,
President

To

The Chairman, Mysore City
Improvement Trust Board,
M y s o r e.

Sir,

With reference to correspondence ending with your letter No.182 dated 4th November 1920 in the matter of the sanction to the revised estimate for the construction of the Mysore City Municipal Office Buildings, Mysore, I am directed to enquire how it is proposed to finance the scheme, regard being had to the other commitments for expenditure of the Board

It will be noted that the revised estimate is for Rs.2,98,000 and though 1/3rd of this cost is debitable to the Municipal Funds, the Municipal Council has ~~only~~ promised to meet the charge by an annual contribution of Rs 5,000 only Thus if the work is to be pushed through rapidly, the whole of the amount will have practically to be found by the City Improvement Board. I am to enquire what allotment is proposed to be made annually for the purpose in the ~~Budget~~ Trust Board Budget, keeping in view the other commitments of the Board and assuming that the Government grant to the Board is confined to Rs 2.75 lakhs annually

In this connection, I am also to enquire what progress there has

been in the contruction and how much expenditure has already been incurred therefor/ and what payments made? A very early reply is requested.

I have etc.,

Secretary to Government,
Revenue Department.

MYSORE

Ml 62-18—8

To

B Ramaswamaiya, Esquire., B A ,
Secretary, to the Government of His Highness
the Maharaja of Mysore, Revenue
Department

Sir

With reference to your Office letter No R 7978/M1 62-18-7 dated 15th January 1921, enquiring how it is proposed to finance the construction of the Mysore City Municipal Office, I have the honor to submit that it is not unknown to Government how much the want of accommodation for the Municipal and Trust Board Offices has been and is most keenly felt, how the various branches of the offices are being held in different places and rented buildings much to the prejudice and inconvenience of public service, and how therefore in the interests of both real economy and work a very rapid completion of the building is an urgent and pressing necessity It should be briskly pushed through, the whole cost (minus the annual contribution of Rs 5,000 paid by the Municipal Council) being, in the first instance, found by the City Improvement Trust Board, subject to adjustment in due course.

2. It was therefore, I had proposed to provide a lac of rupees per year for the next two years so that the building might be completed on or before the end of the official year 1922-23, presuming that the Government would continue to grant to the Board 3½ lacs of rupees annually as had been fixed, excluding the revenue and other income to be realized by the Board

3. An expenditure of over a lac of rupees out of the estimate of Rs 2,98,000 has already been incurred on this building up to the middle of February 1921 as per details given in the margin, and only about Rs 1,97,000 has yet to be found.

1. Works executed.	Rs.	37,353 0 6
2. Materials (Timber, Steel Girders, Tiles etc).	Rs.	64,042 15 10
Total Rs		1,01,396 8 4
3. Payments made up to 14th February 1921. Rs		97,448 7 4
Balance to pay Rs		3,948 1 0

4. His Highness the Maharaja has been graciously pleased to lay the Foundation Stone of this Mysore City Municipal Office on Monday the 24th January 1921, and the building has now come up to the basement level.

5. If Government now reduce the annual grant of 3½ lacs of rupees to the Board, it will not be possible to provide for this building a lac of rupees but with difficulty at least some 50,000 rupees per annum will have to be allotted in which case it cannot be completed by the end of 1922-1923, but would drag on for four years, which is not only undesirable as good deal of materials especially wooden frame work etc., would be deteriorating exposed to inclemency of weather but also un-economical in the long run, apart from great many other drawbacks and disadvantages to the Municipal as well as the Trust

Board Administrations. Further, it is very objectionable to allow such an open and important locality on the highway, in close proximity to Palace and other commanding buildings to continue an eyesore and a nuisance for any length of time.

6. I have accordingly to request that Government may be pleased to continue, as for special considerations, the annual grant of 3½ lacs of rupees to the Board, with permission to utilise the income to be realised , more particularly in view of the Municipal Council making good a lac of rupees eventually of the outlay on the City Municipal Office

7. I am preparing and shall submit presently, for orders of Government a programme of Trust Board works to be carried out during the next 15 years which may be dealt with on their own merits, without reference to the Municipal Office which has to be completed with as least delay as possible.

I have the honour to be,

Sir,

Your most obedient servant,

Chairman

MRV

DOR. 10735 — 1921-19-9 — 28.3.21

Sir,

With reference to the correspondence ending with your letter No 8 dated 22nd February 1921 in regard to the ways and means for financing the construction of the Municipal Office buildings, I am directed to state that it is not possible to allot Rs 50,000 annually for the work or to make any special allotment for it and that funds for the work must be found out of the grant to be sanctioned for the Board in the future years

2 In this connection, I am to state that it is under contemplation to reduce the present annual grant to the Board by one-half, as it is unavoidable, and in these circumstances, I am directed to request you strictly not to undertake any fresh works and commit Government to further expenditure

3 The programme of works stated to be under preparation may be submitted without further delay

S

With reference to correspondence ending with the Chief Engineer's letter No.B.11234 dated 20th April 1920, I have the honour to forward, for favour of sanction, the accompanying revised estimate amounting to Rs 3,02,800 as corrected in this office, received from the Chairman, Mysore City Improvement Trust Board, for the construction of the New Municipal office building at Mysore

2. The estimate as forwarded to you with this office letter referred to above amounted to Rs 2,98,200. This estimate seems to have been obtained back from your office by the Chairman directly in view to carry out certain modifications. A comparative statement showing these modifications is prepared and put up for information. These involve a further excess of Rs ~~14,600~~ 4600 and the reasons therefor are explained by the Chairman in his letter No.434 dated 24th September 1922 and its accompaniments. The net excess over the original estimate of Rs ~~1,43,000~~ 143800 sanctioned for the building in G.O. No.4203-6/Ml.24-16-41 dated 8th January 1917 thus amounts to Rs 1,59,000-

The main items contributing to the excess are detailed in the Chairman's report dated 23th May 1922 accompanying the estimate

3. The provision made in the estimate under items Electric, Water Supply and Sanitary fittings, seems inadequate. This was pointed out to the Chairman but he has not increased the provision under the items, perhaps in view to keep down the amount of the excess over the sanctioned estimate. The provision, however, may have to be increased eventually when works are actually undertaken-

4. Out of 48 girders purchased, only 42 are proposed to be utilised for the work. But the whole cost of 48 girders was debited by the Chairman to the estimate. This is not the correct procedure. If the remaining 6 girders are not required for the work, they must be taken on to stock and the proportionate cost of only 42 girders debited to the estimate. This has now been done and the amount of the estimate as received from the Chairman reduced by about Rs 4,800-

5. The question of rates was discussed in detail by the Chairman with me from time to time and certain rates arrived at. But the Chairman points out that the contractor does not accept these, and he has therefore provided in the estimate the rates demanded by the contractor. These are in some cases higher than the rates paid by P.W.D. in Mysore-

6. There is a provision of Rs 40,000 for the work in the Trust Board Budget Estimate for the year 1922-23.

I have the honour to be,

Sir,

Your most obedient servant

Secretary to Government,

P.W.Department.

24th September 1922.

Dear Mr.Cadambi,

I have received your D.O. letter No.196 dated 14th September 1922, regarding the estimate for the construction of the New Municipal office buildings. The original estimate for Rs 2,98,200 I wrote and got back direct from Government in pursuance of yourself having asked me to do so, and submit a revised estimate once for all in a complete form, in the light of your instructions contained in your D.O.No.89 dated 6th August 1921 approving of certain changes proposed in the note which accompany my D.O. No.43 dated 24th January 1921 before the original modified estimate was sanctioned by Government.

2 Deviations from the modified estimate were also effected in certain instances with a view to minimise the cost. In place of ordinary terrace on teak joists, jack arch terracing on steel joists are provided as the proportionate cost works out cheaper by nearly 8 rupees per square (vide data enclosed). Further, for such a big building, sound seasoned timber is not easily procurable even at a rate of Rs 6-8-0 per cubic foot as provided for in the estimate not to say, of the inconvenience caused both to the contractor and the department in selecting good joists required for the work.

To effect more savings, only the outside cornice has been retained and the inside one omitted, except for the Council Chamber.

For basement slabs, the same design as is adopted in the adjoining palace office block is adopted. The rate of Rs 1-14-0 per square foot now given, works out to nearly the same rate paid for similar works in the new Palace Office Block (data for rate is enclosed).

All the main and cross walls are being built in ground floor with wire-cut bricks up to 12 feet in height and the height of walls both in the ground and first floors is increased by nearly 2 feet as suggested by the Chief Engineer(vide para 6 of the report

The main items causing excess was already explained in my letter No.81 dated 19th July 1922.

Some other minor alterations which were considered necessary were made to suit the present requirements.

3. As regards the rate of 12 annas per cubic foot for wire-cut bricks, the present rate given is one anna less than what has been approved of by you (vide modified estimate sent to Government for sanction where 13 annas per cubic foot has been passed).

On enquiry, I learn that the contractor of the New Guests Mansion works had given an agreement accepting a rate of Rs 20 for 1000 wire-cut bricks, delivery being at work site, on the score of the large order (i.e., 20 lakhs) placed with him by the P.W.D. As the bricks are being supplied to the Municipal Office contractor by him, as well as by the City Brick and Tile Works at Mysore at Rs 30 per 1,000 at the Manufactory, and as the contractor has to incur additional carting charges, the present rate given appeared to be reasonable, compared to the rate paid by the Palace Marahmat Department-

A slight increase in rate for teak wood doors, gothic head over doors and windows &c., was provided for, as the contractor complained of heavy loss on account of interest on the timber logs purchased by him long ago which could not be used now, owing to change of design from ordinary terrace with teak wood joists to jack arches with steel joists.

As regards small deviations in rates in other cases, the reasons for giving slightly higher rates have been explained in the comparative statement in remarks column (vide statement enclosed)

The excess due to the increase in rates in certain items noted above, is counterbalanced by the savings effected by decrease in rates given for wire cut brick work and some other items in the present estimate.

4. Some provisions of Rs 4,000 for water supply and sanitary fittings, and Rs 5,000 for electric fittings as had been entered in the previous modified estimate has been retained in the present one also.

5. As regards girders I enclose the copy of reply sent to your personal assistant on the subject. If you still consider that the girders are to be taken to stock, the same may be done under the present market value, debiting the difference in costs to the New Municipal Office buildings. After all, it is mere book adjustment.

6. In conclusion, I wish only to add that the present rates were accepted by the contractor only after a great deal of conversation and pursuation, and not what was demanded by him as already stated in my letter No.1201 dated 28th May 1922. Even now the contractor has been complaining of loss on account of timber and some other items.

Yours sincerely,
(Sd) C.Srikanteswara Aiyar.

Mysore,

6th February 1923

Municipal Office Building — The ground floor is now almost complete and we are plastering the inside walls. But it will not be fit for occupation, as the jack arch terraces cannot be plastered without allowing time to set and get hardened during next rains, and owing to incessant disturbance and the falling of brick bats and other materials in the course of construction of the first floor, nor is it safe or desirable to stop its progress or defer it, as the roof and terrace works of such a large building cannot be manipulated without serious damages and incidental eventual loss to Public Funds It is therefore necessary to complete the 1st floor also, as early as possible, both in the interests of real economy and in consideration of its commanding view and environments where, otherwise, it will be a regular eye-sore

With the object of completing it therefore quickly, a sum of Rs.1,20,000 has been provided for this work in the Triennial Programme, submitted to Government with my letter No 53 dated 3rd February 1923, at Rs 40,000 a year The Contractor had already made arrangements with the Contractor of the new Guests' Mansion, through the Public Works Department, for about ¾ lacs of good bricks required for the 1st floor This arrangement has been made by the Public Works Department with the Contractor of the Guests' Mansion, mainly in

part satisfaction of the contract entered into by the D P.W with him for the supply of 20 lacs of bricks required for the whole of the Mansion, including the several blocks. Such large quantity of bricks are not now required for that work owing to the construction of the other blocks having been deferred for want of funds, but the order for the supply of 20 lacs of bricks cannot be cancelled, as the Contractor would claim damages, were the whole order cancelled Hence it necessitated the placing of an order for the supply of 7½ lacs of bricks required for the 1st floor of the new Municipal Office, with the contractor of the Mansion as a solatium to him, through the Chief Engineer, and towards the same end, I bought of him also, another 3 lacs of wire cut bricks for the ground floor

Further, out of the large advance made at the beginning to the Contractor of the Municipal Office for materials, he had collected all the materials required for the 1st floor and had also long ago finished all the wooden frames and shutters, for all the doors and windows of the ground and first floors together, besides a large quantity of flooring materials and tiles, which, if not used up in time, will get badly damaged and deteriorated

The total amount of the revised estimate for constructing the New Municipal Office buildings is Rs 3,02,800 The construction of some independent works to the extent of nearly Rs 54,000 as per margin which are not of an

	Rs.
Construction of compound wall with ornamental railings etc	15,000
Cost of constructing outhouses etc	24,250
Contingencies	14,700
Total Rs	53,950 or
Rs 54,000 nearly	

urgent nature, can be deferred for some time longer, as they can be taken up when funds become available The net amount required for the main building itself, after excluding Rs. 54,000, is Rs.2,45,600, against

which the paid up outlay to end of July 1923 has been Rs.1,31,600, leaving the balance required for its completion Rs.1,17,000 Out of Rs.40,000 provided for this building in the current year's budget, Rs 20,500 is still available. Deducting this amount from Rs.1,17,000, what will be required for its completion is only Rs.96,490. To meet this, Rs 80,000 is budgetted for during the next two years, as per Triennial Programme recently submitted. The extra small amount of Rs.16,490 (Rs 96,490 -- Rs 80,000) will not be required till the work is fully completed, and the Contractor would also naturally wait for payment, till completion bills are made out, or can be met either by re-appropriation or by savings effected by eliminating some other minor items of works which may not seem pressing or urgent as the work progresses

I have given my most anxious consideration to the present financial conditions and particularly to your instructions not to begin the 1st floor, till sanction of Government is obtained. But under the foregoing circumstances, I feel, that with all deference to your wishes, I should beg of you to kindly see your way to permit us to go on with the 1st floor of the building and complete it as expeditiously as possible, inasmuchas the money required therefor, is duly provided in the Triennial Programme and no further allotment from Government is needed

I shall feel very thankful for favour
of your kindly reconsidering the subject and obliging
me with needful instructions as early as possible.

Yours Sincerely,

Vikram Sarabhai
